Tue, 06 Nov 2018 21:09:00 GMT Consumed (Consumed, #1) by Skyla Madi - Goodreads - In regard to the first research question, energy drink consumption patterns among college students, 51% of participants (n = 253) reported drinking greater than one energy drink each month in an average month for the current semester, with significantly more female (53%) than male (42%) energy drink users reported, $\chi^2(1, N = 496) = 6.46, p = .01$. A survey of energy drink consumption patterns among ... - Thus, direct assessment of dietary intake may be more informative than biomarkers are [8,10]. Among the available dietary assessment

methods, the food frequency questionnaire (FFQ) has been widely used in large epidemiological studies since the 1990s. Dietary assessment methods in epidemiologic studies - This effect of partitioning is demonstrated for the consumption of chocolates (Study 1) and gambles (Study 2). In Study 3, process measures reveal that partitioning increases recall accuracy and decision times. Importantly, the effect of partitioning diminishes when consumers are not trying to regulate consumption (Studies 1 and 3). The Effect of Partitions on Controlling Consumption ... -
